Professional Summary

Backend Developer with 4 years' experience in backend systems and SQL. Currently pivoting from database-focused roles into software development, building projects in React, Node.js, and Kotlin. Trilingual (EN/FR/ES) and passionate about writing clean, scalable code.

Core Skills

- Backend: C#, Java, Python, Node.js, REST APIs, Kotlin
- Frontend: React, JavaScript (ES6+), HTML5, CSS3, Android Compose
- Databases & Tools: SQL Server, Firestore, Git, Agile, SSIS, SSRS

Professional Experience

Backend Engineer / SQL Developer — Global Excel Management | Sherbrooke, QC | Dec 2021 – Present

- Built and optimized backend integrations using C# and SSIS to process millions of records monthly
- Designed REST-like APIs and scalable backend components to support 500+ users in real-time
- Reduced query times by 30% and automated reporting pipelines, saving 120,000+ hours of manual work
- Collaborated with cross-functional teams to deliver business-driven software solutions

Selected Projects

- Habits Tracker (Kotlin) – Android app using MVVM architecture and Room DB
- HashMap (JavaScript) – Custom HashMap and LinkedList structures with collision resolution
- Portfolio (React) – Responsive personal site showcasing applications
